

## Are you not receiving the best small unit training possible? Let's work together to change that!

NATO member countries, the southern Americas, Asia and Africa, what do they have in common? Conflict in urban environments: drug trafficking in Mexico, Colombia, terrorism attacks in Mumbai and London, expeditionary missions to Afghanistan and Iraq, etc. Statistics vary but roughly 50% of the world's population will be living in urban environments in 2030. We know that training for urban operations is one of the most important aspects of the contemporary curriculum of small units as operating in these 3D environments is very complex.

We believe that virtual training increases the quality of live training. re-lion Small Unit Immersive Trainer (SUIT) can provide your unit with a tremendous variety of short complex scenarios. Rapidly iterating these scenarios increases decision making skills. Live training combined with SUIT results in more capacity of existing live training assets and/or better skilled trainees.

## TOP REASONS TO START USING RE-LION SUIT

### 1 High learning value

- Scientifically validated
- Rapidly exercise (complex) scenarios
- After Action Review
- Fully immersive

### 3 Cost effective

- Train any situation in any culture
- Rapid terrain database generation
- No actor, fuel and ammunition cost
- Easy to operate and maintain
- Safe, zero risk

### 2 Train as you fight

- Team based (max 12 persons)
- Natural locomotion
- No mouse and keyboard
- Scales in floor coverage
- Wireless weapons

### 4 Flexible

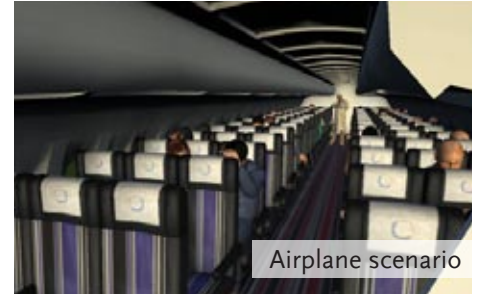

- Train anywhere anytime: home or deployed
- No travel time
- Create your own scenarios
- Integrates any weapon platform
- Interoperable with VBS2
